HOW TO READ YOUR  
DIGITAL WATER METER

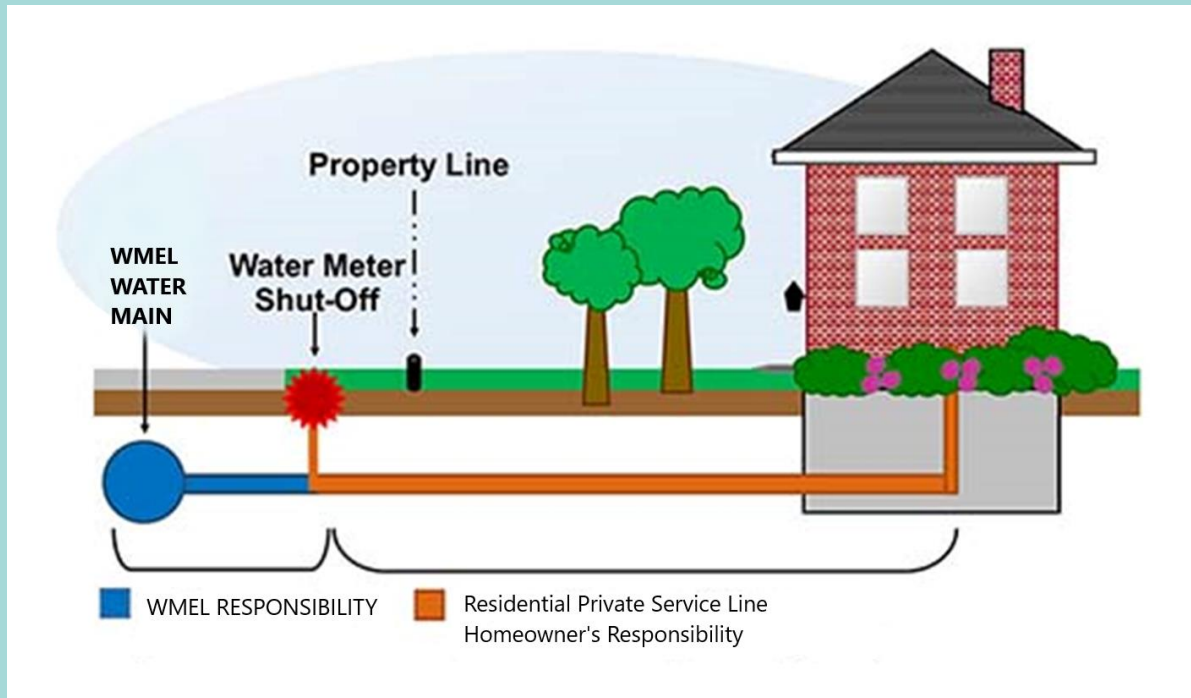

***REPLACED  
MOST OF THE  
WATER  
METERS IN  
THE SYSTEM  
WITH A  
DIGITALLY  
READ METER***

THE METERS WERE REPLACED WITH ONES THAT CAN BE READ DAILY FROM THE OFFICE. IN DOING SO, WE CAN NOTIFY THE CUSTOMER OF A POSSIBLE LEAK, MOST TIMES WITHIN 48 HRS OF OCCURANCE.

# ***WHERE IS MY WATER METER?***

- THE WATER METER WILL BE ON THE COUNTY RIGHT OF WAY
- IT WILL BE IN EITHER A PLASTIC OR CONCRETE BOX

# ***HOW DO I READ MY METER ?***

The top left corner of the meter will show how much water is currently going through the meter. All 0's means no water is being detected.

The middle box will provide an arrow showing the direction of flow.

The right box will show a water drop when a leak is detected. A leak alert will show after 24hrs of continuous usage. If usage stops for 3 hrs. the alert will clear.

THE NUMBERS ON  
THE BOTTOM ARE  
THE READING. WE  
READ FROM LEFT TO  
RIGHT. THE  
READING THE  
WOULD BE ON THE  
BILL WOULD BE 954.  
WE BILL IN  
HUNDREDS SO WE  
DROP THE LEAST 2  
NUMBERS.

*This is what a  
water meter  
looks like with  
**NO WATER**  
going through  
it.*

ALL 0'S

NO ARROW

**WATER DISCOVERED  
WITH WATER  
BEING  
DETECTED  
WITH A LEAK  
ALERT.**

**SHOWS 2.0 GPM**

**SHOWS ARROW WITH  
DIRECTION OF FLOW**

**SHOWS LEAK ALERT**

# ***WHAT CAN WMEL DO WITH THIS NEW TECHNOLOGY***

- WMELWSA WILL RECEIVE A LIST OF LEAK ALERTS DAILY ON WATER METERS THAT ARE CONNECTED TO THE AMI NETWORK
- WMELWSA WILL GIVE A COURTESEY CALL TO INFORM A CUSTOMER OF A POTENTIAL LEAK
- IT IS IMPORTANT THAT WE HAVE A CORRECT PHONE NUMBER SO YOU CAN BE CONTACTED.
